

**3354:1-20-04 Policy on health, safety, and the environment.**

- (A) The College is firmly committed to protecting the environment it shares, and the health and safety of all members of the College community. The College shall:
- (1) Establish and implement detailed procedures intended to honor its commitment to protecting health, safety, and the environment.
  - (2) Monitor and comply with the extensive environmental, health, and safety laws and regulations that apply to the College.
  - (3) Develop and implement training and prevention programs to help minimize environmental, health, and safety risks.
  - (4) Identify employees who will be responsible for environmental, health, and safety issues; and take steps to inform the College community how to report incidents and concerns to these employees.
  - (5) Develop and implement appropriate remedial measures, should an environmental, health, or safety incident become known to the College.
  - (6) Communicate and coordinate with local authorities, as appropriate.
- (B) The President or the President's designee is hereby directed to take all steps necessary and appropriate for the implementation of this policy.

Effective date: December 15, 2005
